ASSIGNMENT 22324601

Step 1 - I created a new repository, DCIT 323. I clicked on the plus button then I chose new respositony.

Step 2 - I cloned the repository to my computer. I started with cd Documents, Documents folder is where I want the repository to be. Then I used the command git clone plus the link of the repository.

Step 3 - I added a picture of this assignment to the respository in file explorer.

Step 4 - I used the command git add. to add the file to the ~~github~~ repository in github.

Step 5 - I used the command git commit to commit everything to the repository.
